S^3 30" Built-in Oven F 306 T XA NA

The Scholtès built-in oven, at 30" (76.2 cm) and boasting a large capacity of 4.1 cu feet, uses a unique dual fan convention system to provide increased air circulation and the most even cooking temperatures available. The dual fans allow heat to reach areas of the oven that a single fan configuration would not achieve. Strong, full-glide reinforced oven racks on ball bearings support the heaviest pans, even in full extension. Twelve oven modes provide versatility, convenience and optimal baking and broiling conditions.
