

Integrated Electric Grill Module MODEL IG15/S

Model IG15/S

► The Wolf Model IG15/S 15" (381) integrated electric grill module is available in the classic stainless steel finish.

This appliance is certified by Star-K to meet strict religious regulations in conjunction with specific instructions found on www.star-k.org.

Who says you have to sacrifice the fun of grilling when the weather changes and you cannot take advantage of the outdoors? With this grill module you can easily handle steaks and all sorts of food without the hassle of lava rocks or briquettes.

There are two 1400-watt heating elements—front and back—on this 15" (381) unit that enables you to cook on one side of the module while keeping other items at serving temperature.

For ease of cleaning, there are porcelain plates below the heating elements that accumulate any unwanted grease and drain it to the removable porcelain collection pan.

With Wolf's integrated modules, you have the ultimate in customization. You can create your own design by mixing and matching the various components within this system.

Integrated Electric Grill Module

MODEL IG15/S

FEATURES

- ▶ Integrated design allows for installation of multiple cooktops or modules
- ▶ Stainless steel top construction with classic stainless steel finish
- ▶ Two 1400-watt, individually controlled heating elements—front and back—for even grilling

Integrated Electric Grill Module

MODEL IG15/S

INSTALLATION NOTES

► Refer to the illustrations and specifications for overall dimensions, cut-out dimensions and installation specifics.

► Wolf recommends using 33" (838) wide cabinets for installation of two integrated modules side by side. An 18" (457) wide cabinet is recommended for installation of a single integrated cooktop module.

IMPORTANT NOTE: Review specific installation instructions for product to product capabilities

► When multiple cooktops or modules are installed side by side, refer to the countertop cut-out dimensions on page 6.

► A Wolf Cooktop or Pro ventilation hood is recommended. When installing a ventilation hood, refer to the specific requirements of the hood for the minimum dimension to countertop. Also refer to the ventilation recommendation charts in the cooktop or Pro ventilation sections of our website, wolfappliance.com.

IMPORTANT NOTE: Wolf does not recommend the use of downdraft ventilation with the integrated grill module.

► The Wolf integrated grill module requires a separate, grounded 3-wire 240/208 V AC, 60 Hz, 15 amp service with its own circuit breaker. It has a 4' (1.2 m) flexible 3-wire conduit for connection at the electrical supply. Locate electrical within the shaded area shown in the illustration on page 4.

► You must follow all National Electrical Code regulations. In addition, be aware of local codes and ordinances when installing your service.

► Refer to the installation instructions shipped with each Wolf product for detailed specifications.

⚠ WARNING

This cooktop is intended for indoor use only.

Integrated Electric Grill Module MODEL IG15/S

MULTIPLE COOKTOP INSTALLATION

With Wolf's integrated modules, you have the ultimate in customization. You can create your own design by mixing and matching the various components within this system. And when you couple these modules with other cooktops within the Wolf inventory you and your client will truly understand freedom of choice.

Some Wolf integrated modules can be installed together or with a 30" (762) or 36" (914) cooktop. When multiple units are installed side by side, the cut-out dimensions that are shown in the illustration are derived by adding 1 1/4" (32) additional space for each additional unit, to give you your total cut-out width. Refer to the illustration below for countertop cut-out dimensions for installation of multiple cooktop units.

When two or more cooktops or modules are installed together, an accessory filler strip is recommended. Refer to Accessories on page 3.

IMPORTANT NOTE: When multiple cooktops and/or modules are installed side by side, each unit must have its own separate recommended electrical circuit. When multiple gas cooktops and/or modules are installed next to one another, they can receive their gas supply from a common line. However, each unit must have its own regulator installed between the mainline and the cooktop or module.

IMPORTANT NOTE: Review specifications for each specific integrated module for installation requirements and limitations. Refer to the integrated modules section of our website, wolfappliance.com.
