kWh/year (kilowatt-hours per year) is a measure of energy (electricity) use.
Your utility company uses it to compute your bill. Only standard size clothes
washers are used in this scale.

**Clothes washers using more energy cost more to operate.
This model's estimated yearly operating cost is:**

\$34

When used with an electric water heater

\$17

When used with a natural gas water heater

Based on eight loads of clothes a week and a 2000 U.S. Government national average
cost of 8.03¢ per kWh for electricity and 68.8¢ per therm for natural gas. Your actual
operating cost will vary depending on your local utility rates and your use of the product.
