LITTLE TREASURE FOR BIG PLEASURE
New Mini Wine Storage Cabinet from Liebherr

Burlington, ON: Proving a big idea can be small, Liebherr introduces its mini wine cabinet with all the big performance features of its award-winning wine storage product line on less than a 17" x 19" footprint. The new WS 1200 is so compact, it can be plugged in anywhere or even wall mounted to optimize space, all while providing the perfect storage conditions for fine wine and accessories.

"Our wine storage product line has expanded to meet the needs of the ever-growing number of wine enthusiasts in this market," states Thorsten Platt, Vice President of Liebherr North America. "The range goes from a large three zone freestanding unit that holds 143 bottles down to our new mini that holds 12 bottles. There's a product to suit every space requirement and lifestyle need," adds Platt.

On its own in a bar or recreation area, in the master bedroom, well placed in a great room, or sitting side-by-side with the new Liebherr humidior, the attractive WS 1200 with stainless steel surround and an integrated recessed handle offers the following features:

- Three solid beech wood shelves and a convenient drawer that maintains a warmer temperature than the wine compartment to house wine accessories, chocolates or candies
- Energy efficient LED ceiling lighting controlled with a dimming function and a permanent "on mode" to create atmosphere without affecting the temperature of the wine
- Activated charcoal filter for pure interior air quality
- Door lock and door and temperature alarms to alert the homeowner to any changes in conditions

- Insulated glass door with UV coating to protect fine wines from light damage
- Innovative MagicEye touch control system to ensure a precise temperature range from 41° F to 68° F (5° C to 20° C).

The WS 1200 is currently in production and will be available to the North American consumer in late summer, 2009. Contact Leanne Newman for further information and high-resolution lifestyle and product images.
