In Harmony with Your Life

Large Oven Capacity

Blomberg knows you can never have too much room in your oven, even if there’s not a lot of room in your kitchen. That’s why we engineered a generous 2.51 cu. ft. oven capacity into our 24-inch range.

Flame-failure Safety Device

All Blomberg 24-inch gas ranges are designed to be intelligent and safe as well as stylish and efficient. Cooking burners are equipped with a flame failure safety device that automatically cuts off the gas supply should a gust of wind, a spill, or a boil-over extinguish the burner flame at any time during cooking.

Easy Clean Gray Enamel

Blomberg 24-inch oven cavities are coated with a long-lasting, nonporous, gray enamel finish that is not only attractive but also extremely easy to clean. Just a simple wipe with a damp cloth is all it takes to remove fresh spills and keep your oven looking like new.

Gas Safety Valve

All Blomberg gas ranges feature oven broilers equipped with a gas safety device that automatically cuts off the gas supply if it senses the broiler flame has been accidentally extinguished during cooking.
