

Bring the garden into your kitchen.

MADE IN THE USA

The finest kitchen in the world doesn't amount to much unless it's filled with your family and friends. Viking Range, LLC applies this same philosophy to our offices and factory floors. Even though our products ship around the world, the company has always stayed true to its roots in Greenwood, Mississippi. The Viking range was born here, and our decision to set up shop (and more importantly, keep shop) in our hometown is a testament to the value of our roots and the commitment we have to building Viking products in the USA.

At Viking, people are our greatest asset. We are very proud of our employees and the products they build here in the USA.

GCV Series

MICRO GREEN & HERB GROWING CABINET

For detailed product information, model numbers, or to request a quote, call 1-888-845-4641 or visit vikingrange.com
© 2017 VIKING RANGE, LLC. ALL RIGHTS RESERVED.

Grow micro greens and herbs all year.

Grow herbs and micro greens 365 days a year. You control the freshly harvested supply of greens for your culinary creations. And they're at their freshest, peak flavor!

Daikon Radish Sprouts—5 days old

COMMIT TO FRESH

All Organic

You control the growing conditions for maximum harvest, and because the cabinet is enclosed and indoors, there are no pests!

Best Nutrition

Some leafy vegetables lose up to half of their nutritional value within days of harvesting. When you serve greens immediately, nutrition is at its maximum value!

Superior Flavor

Growing your own ensures you get the full flavor of farm fresh produce!

IT'S EASY TO PLANT AND GROW!

- ▶ Simply sow your seeds in common 10"x20" garden flats, using traditional soil or hydroponic media
- ▶ Cover your trays with humidity domes and put them in your GCV growing cabinet
- ▶ Set the growing cycle for your particular plants
- ▶ When your seeds sprout (typically 2-4 days), remove the humidity domes
- ▶ Grow until you're ready to harvest, depending on the variety of plant, this could be as little as 7 days

ENJOY!

Harvest and save.

When you grow your own flats of greens, you can save 75% or more off the price of purchasing them from the grocery store. Your herb cabinet can pay for itself in a short period of time.

CUT THE COST OF BUYING ORGANIC HERBS AND MICROGREENS

Average retail cost per ounce in the grocery store: \$4.00

Average cost per ounce grown from seed: \$1.00

Growing from seed saves you 75%

PLUS...

- ▶ There's no waste—you harvest only what you need
- ▶ There's no rush to use what you buy before it goes bad—you let the rest keep growing
- ▶ And you can grow more exotic greens than you can find in the grocery store! Shiso, mizuna, komatsuna, sorrel... even edible flowers!

PRODUCT INFORMATION

High Output Growing Lights: The cabinet is equipped with high output T5 growing lights to replicate the sun's rays and get the best growth possible. Light is distributed evenly, with diffuser panels.

Automatic Watering System: The system features a filter with water pump for irrigation. It can be manually filled or hooked up to city water and drain.

Fully Automated Growing System: The digital system is fully automated for light, watering and air circulation for optimal growth. It comes with 39 preprogrammed cycles for the most common greens, PLUS it is fully programmable for custom cycles.

Separate Growing Zones: Each zone accommodates one 10" x20" growing flat.
